BASSEM ALI

Full stack Developer

Qalyubia, Khanka, Egypt | bassemali109238@gmail.com | 01125567499 | LinkedIn | GitHub | Portfolio

SUMMARY

Full-Stack Developer specialized in Node.js, Express, MongoDB, and Next.js, focused on building scalable RESTful APIs, real-time WebSocket systems, and secure, transaction-safe database architectures. Experienced in designing complete e-commerce, messaging, and AI-powered applications end-to-end — from database schema and backend logic through responsive front-end interfaces and deployment.

TECHNICAL SKILLS

- **Back-End:** Node.js, Express.js, RESTful APIs, WebSockets (Socket.io), JWT, Bcrypt, Role-Based Access Control (RBAC)
- **Databases:** MongoDB, Mongoose (Transactions, Aggregation, Schema Architecture, Bulk Operations)
- **Front-End Fundamentals:** Next.js, React, JavaScript (ES6+), Tailwind CSS, Framer Motion, HTML5, CSS3
- **AI Integration :** Google Gemini API (prompt design, structured content generation)
- **Tools & Methodologies:** Git, GitHub, Postman, Environment Configuration, Data Structures & Algorithms

WORK EXPERIENCE

Independent Full-Stack Developer *Freelance* 2025 – Present

- Engineered and deployed scalable full-stack web applications using Next.js, Node.js/Express, and MongoDB for client and portfolio projects.
- Built responsive front-end interfaces and integrated them with custom RESTful APIs, covering authentication, data management, and third-party service integration.
- Communicated directly with stakeholders to analyze technical requirements and resolve system issues promptly.

PROJECTS

AI-Powered CV Builder (Full-Stack Application)

- Built a full-stack app (Next.js/Tailwind frontend, Node.js/Express/MongoDB backend) that generates and refines CV content using the Google Gemini API.
- Implemented client-side PDF export with custom print stylesheets, and JWT authentication across separate frontend/backend domains.

BackEnd : https://github.com/Bassem-Fullstack/ResumeCV-Backend.git | FrontEnd : https://github.com/Bassem-Fullstack/ResumeCV-FrontEnd.git | Live Demo : https://resume-cv-front-end.vercel.app

Translation App (Full-Stack Application)

- Built a translation app with a Next.js + Tailwind CSS frontend and an Express.js backend.
- Integrated the Google Gemini API for text translation between languages.
- Added voice input and speech output using the browser Web Speech API.

BackEnd : github.com/Bassem-Fullstack/TranslationBackEnd | FrontEnd : github.com/Bassem-Fullstack/TranslationFrontEnd
Live Demo : https://translation-front-end-bice.vercel.app/register

Coffee Store Platform (Full-Stack Application)

- Built a full-stack storefront (Next.js frontend + Node.js/Express/MongoDB backend) covering product catalogs, customized orders, and order-status tracking.
- Secured user login and order history with JWT authentication and Bcrypt password encryption.

Backend: github.com/Bassem-Fullstack/coffe-store-backend | Frontend: github.com/Bassem-Fullstack/Coffe-Store-FrontEnd
Live Demo : https://coffe-store-frontend-only.vercel.app

EDUCATION

B.Sc. in Information Systems — Al-Obour Higher Institutes | 2023

SEF Academy — Full-Stack Development Training (Node.js / Express / MongoDB, Next.js / React)
